

Rapid Response Dispatch

Three easy steps—no contract or payment required upfront

1

Call to report the passing

Once you let us know it's a hospice referral, we'll guide you through an abbreviated intake flow to gather only the most essential details.

- | | |
|---|--|
| <input type="checkbox"/> Hospice name | <input type="checkbox"/> Pick-up address |
| <input type="checkbox"/> Patient's name | <input type="checkbox"/> Stairs or obstacles |
| <input type="checkbox"/> Weight | <input type="checkbox"/> Next-of-kin contact information |

Key Requirements

- The family in need must have the ability to pay. For those that are unable to pay, we recommend exploring donation to medical research.
- The next-of-kin provided must be verifiable.

2

We dispatch immediately

From there, we have what we need to send our nearest transport unit right away. With payment and contract no longer required upfront, this shortens your expected wait time significantly—especially if a patient passes in the middle of the night.

3

We follow up with the family

Once the patient is in our care, we'll follow up with the family promptly to collect any remaining details, secure payment, and obtain the signed contract.
